EXPERIENCE

Software Engineer Intern @ LiveStack

05/2020 - 06/2020 // San Francisco, CA

- Built **full stack creator authentication** feature, enabling creators to confirm their identity through email, Twitter, or Instagram
- Developed back end **authentication routes and APIs**, Passport.js strategies, **database migrations** to include new table columns that keep track of authentication for security, and UI to alert creators of auth status
- Utilized **React**, Bootstrap, and Sass to build responsive, on-brand UI
- Languages & technologies:** JavaScript (React, Node.js, Express.js), HTML, CSS, Sass, PostgreSQL, Redis, SendGrid, Passport.js, Git, Jest

Senior Associate Consultant, Strategy @ Prophet

09/2017 - 02/2020 // San Francisco, CA

OTHER POSITIONS HELD: Associate Consultant, Summer Associate

- Developed brand strategies for **Fortune 500 companies across tech**, mobility, healthcare, finance, and CPG, collaborating across departments (marketing, product, insights, sales, operations, finance, design)
- Promoted early** by demonstrating the ability to break down complex problems, plan out an approach, and uncover insights independently
- Headed the problem-solving process for my projects, including framing the problem, outlining potential approaches, identifying knowledge gaps, designing market research to fill those gaps, and developing solutions
- Mentored and trained Associate talent** on projects, working with them to strengthen their output and find opportunities for them to grow
- Presented our strategies to **stakeholders at C-suite and SVP level**, including a CTO and SVP of Product of a large design software company

Undergraduate TA for Economics of Gender @ UNC, Chapel Hill

01/2017 - 05/2017 // Chapel Hill, NC

- Held office hours to help students with questions related to the material, projects, and test preparation; Developed practice exam questions

PROJECTS

Jobly - a job application site built using **React** on the frontend. Backend is built with **Express** and **PostgreSQL**. [Demo](#) | [Github](#).

Warbler - a Twitter clone built using **Python**, **Flask**, and **PostgreSQL**. [Demo](#) | [Github](#)
